February 2020

SPRUCING UP ST. LOUIS STREET

(Left) Installing refurbished loading dock gates, (right) new sidewalk and bollards at gates
SITWORK activities continued along St. Louis street this month. This can be seen in the new concrete curbs and sidewalks along much of the length from the corner at St. Joseph street to the parking garage. Both the loading dock area and the trash bin area were graded and new concrete slabs placed this month. The existing ornamental metal gates were removed for construction and reinstalled this month.

OTHER PROGRESS: Roofing work has proceeded to the narrow level 4 roofs; the last of the roofing. The government punchlist of level 2 occurred in January while level 1 was reviewed and punched by the DB team. Installation of fire alarm and security devices proceeded through the building this month. Work on the mechanical systems is working towards an inspection by the government at the end of February. Installation also began on the optical turnstiles in the entry vestibule.
